VOL. 36 PAGE 644 Panola County Commissioners Court

A set of lights along the runway have been working intermittently for the past year. Craig Electric has looked at them in the past and couldn't figure out the problem.

The lights stopped working totally about a month ago, and Craig Elec. suggested to get someone that specializes in Airport lighting to look at them as the lighting fixture was a sealed unit and they were not comfortable looking at it if something broke.

I called Bob Love Electric out of Tyler because he is an Airport Lighting electrician.

His proposal for the repair is attached.

John DePesa Jr.
