

## Limited English Proficiency Plan

Name Grantee:	Panola County
Community Population:	2,713
LEP population:	63 (2.3%)
Languages spoken by more than 5% of population per ACS:	N/A

Program activities to be accessible to LEP persons:	
<input type="checkbox"/>	Public Notices and hearings regarding applications for grant funding, amendments to project activities, and completion of grant-funded project
<input type="checkbox"/>	Publications regarding TxCDBG application, grievance procedures, <i>complaint procedures, complaint procedures, answers to complaints, notices, notices of rights and disciplinary action</i> , and other vital hearings, documents, and program requirements
<input type="checkbox"/>	Other program documents: _____

Resources available to Grant Recipient:	
<input type="checkbox"/>	Translation services _____ _____
<input type="checkbox"/>	Interpreter services: _____ _____
<input type="checkbox"/>	Other resources: _____ _____

Language Assistance to be provided:	
<input type="checkbox"/>	Translation (oral and/or written) of advertised notices and vital documents for _____
<input type="checkbox"/>	Referrals to community liaisons proficient in the language of LEP persons _____
<input type="checkbox"/>	Public meetings conducted in multiple languages: _____
<input type="checkbox"/>	Notices to recipients of the availability of LEP services: _____
<input type="checkbox"/>	Other services: _____

DP02

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010-2014 American Community Survey 5-Year Estimates

**Note.** This is a modified view of the original table.

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties

Subject	Panola County, Texas		Census Tract 9502, Panola County, Texas	
	Estimate	Percent	Estimate	Percent
<b>LANGUAGE SPOKEN AT HOME</b>				
Population 5 years and over	22,338	22,338	2,713	2,713
English only	20,710	92.7%	2,413	88.9%
Language other than English	1,628	7.3%	300	11.1%
Speak English less than "very well"	646	2.9%	63	2.3%
Spanish	1,471	6.6%	298	11.0%
Speak English less than "very well"	638	2.9%	61	2.2%
Other Indo-European languages	84	0.4%	0	0.0%
Speak English less than "very well"	0	0.0%	0	0.0%
Asian and Pacific Islander languages	73	0.3%	2	0.1%
Speak English less than "very well"	8	0.0%	2	0.1%
Other languages	0	0.0%	0	0.0%
Speak English less than "very well"	0	0.0%	0	0.0%
<b>ANCESTRY</b>				
Total population	23,880	23,880	2,919	2,919

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010-2014 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
