NOTICE OF PROPOSED INSTALLATION
PIPELINE AND/OR UTILITY LINES

TO: THE PANOLA COUNTY COMMISSIONER'S COURT

c/o

PANOLA COUNTY ROAD & BRIDGE DEPARTMENT, CARTHAGE, TEXAS

Formal notice is hereby given that:

Gill Water Supply Corp. proposes to place a
(COMPANY NAME)

Bore Co. Rd. 3072 with 3" casing for a 2" Water Main
Bore will be 3ft. below ditch line. (line within the Right-of-Way
(PIPE SIZE)

of County Road: 3072 as follows:
(NUMBER OF ROAD)

The proposed pipeline will cross under the indicated roads on the attached sheet.
Installation shall be made by boring a total length of 20ft line in Panola County.

The location and description of the proposed line and appurtenances is more fully shown
by the copies of the drawings attached to this notice. The line will be constructed and
maintained on the County Right-of-Way as directed by the County Commissioners in
accordance with current Panola County Specifications

Construction of this line will begin on or after the 12 th day of
September, 2017.

FIRM: Gill Water Supply Corp.

RE: **CR #3072**

The Panola County Commissioners' Court offers no objection to the location on the right-of-way of your proposed **Boring with 3" casing line** (2" Water Main Bore will be 3 ft. below ditch line) within the right-of-way of County Road **#3072** as shown by accompanying drawings and notice except as noted below.

It is expressly understood that the County Commissioners' Court does not purpose hereby, to grant any right, claim, title or easement in or upon this county road. It is further understood that in the future should for any reason the county need to work, improve, relocate, widen, increase, add to, or in any manner change the structure of this right-of-way, any required relocation of said lines shall be at the sole expense of owner.

All work on the county right-of-way shall be performed in accordance with the county instructions. The installations shall not damage any part of the road and adequate provisions must be made to cause minimum inconvenience to traffic and adjacent owners. Special specifications for placing this line are as follows:

1. All lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or barrow ditch.
2. All excavation within the right-of-way and not under surfacing shall be backfilled by tamping in 6 inch horizontal layers. All surplus material shall be removed from the right-of-way and the excavation finished flush with surrounding natural ground
3. Lines crossing under surfaced roads and under surfacing cross roads within the right-of-way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity from sewer lines under roadways shall be cast iron pipe.
4. All lines, where practicable, shall be located to cross roadbed at approximately right angles thereto. No lines are to be installed under or within 50 feet of either end of any bridge No lines shall be placed in any culvert or within 10 feet of the closest point of same.

5. Parallel line will be installed as near the right-of-way lines as is possible and no parallel line will be installed in the roadbed or between the drainage ditch and the roadbed without special permission of the Panola County Commissioners' Court.
6. Operations along roadbeds shall be performed in such manner that all excavated material be kept off the pavement at all times, as well as all operating equipment and materials. No equipment or installation procedures will be used which will damage any road surface or structures. The cost of any repairs to road surface, roadbed, structures or other right-of-way features as a direct result of this installation will be borne by the owner of this line.
7. Barricades, warning signs, lights, and flag man(men) when necessary shall be provided by the contractor or owner. One-half (1/2) of the traveled portion of the road must be open at all times.

Approved: 
COUNTY JUDGE

RE: CR #117

The Panola County Commissioners' Court offers no objection to the location on the right-of-way of your proposed **6" Casing for an Electric Line** within the right-of-way of County Road **#117** as shown by accompanying drawings and notice except as noted below.

It is expressly understood that the County Commissioners' Court does not purpose hereby, to grant any right, claim, title or easement in or upon this county road. It is further understood that in the future should for any reason the county need to work, improve, relocate, widen, increase, add to, or in any manner change the structure of this right-of-way, any required relocation of said lines shall be at the sole expense of owner.

All work on the county right-of-way shall be performed in accordance with the county instructions. The installations shall not damage any part of the road and adequate provisions must be made to cause minimum inconvenience to traffic and adjacent owners. Special specifications for placing this line are as follows:

1. All lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or barrow ditch.
2. All excavation within the right-of-way and not under surfacing shall be backfilled by tamping in 6 inch horizontal layers. All surplus material shall be removed from the right-of-way and the excavation finished flush with surrounding natural ground
3. Lines crossing under surfaced roads and under surfacing cross roads within the right-of-way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity from sewer lines under roadways shall be cast iron pipe.
4. All lines, where practicable, shall be located to cross roadbed at approximately right angles thereto. No lines are to be installed under or within 50 feet of either end of any bridge. No lines shall be placed in any culvert or within 10 feet of the closest point of same.

5. Parallel line will be installed as near the right-of-way lines as is possible and no parallel line will be installed in the roadbed or between the drainage ditch and the roadbed without special permission of the Panola County Commissioners' Court.
6. Operations along roadbeds shall be performed in such manner that all excavated material be kept off the pavement at all times, as well as all operating equipment and materials. No equipment or installation procedures will be used which will damage any road surface or structures. The cost of any repairs to road surface, roadbed, structures or other right-of-way features as a direct result of this installation will be borne by the owner of this line.
7. Barricades, warning signs, lights, and flag man(men) when necessary shall be provided by the contractor or owner. One-half (1/2) of the traveled portion of the road must be open at all times.

Precinct #4 Dale LaGrone

**SPECIAL SPECIFICATIONS
FOR PIPELINES CROSSING IN BORED HOLES
AND PLACED PARALLEL TO COUNTY ROADS**

GENERAL NOTE: The construction of this project shall follow “The Panola County Road and Bridge Department Standard Specifications” with respect to barricades, flagmen, flares, warning signs, and all responsibility for complaints or damage suits by traveling public and adjacent property owners

1. Exaction material shall not be placed on road shoulders or traffic lanes or in ditches where drainage would be impaired. When excavation is permitted near the roadway, where, in the opinion of the County, the support of the oil road structure is endangered, sheeting, cribbing, other measures shall be taken to prevent damage to the roadway or the creation of traffic hazard
2. All excavations shall be backfilled in a neat and workmanlike manner and all disturbed areas shall be restored to a condition comparable to the original condition. Backfill material shall be consolidated to a density comparable to that of the adjacent undisturbed material, replacing all of the excavated material except that displaced by pipe. The degree of compaction shall be such as to prevent future settlement. Excess material displaced by the pipe shall be removed from the right-of-way or otherwise disposed of to the satisfaction of the county’s representative. Pipe laying operation shall not be carried on when soil conditions are such that construction equipment will cause rutting. Backfill operations shall be kept within one mile of trenching and/or pipe laying operations.
3. Sod and/or other erosion control measures removed or disturbed by the installation shall be replaced. This shall include keeping separate and replacing existing topsoil, importing sod or seeding or a combination of these methods together with fertilizer and water as necessary to re-establish vegetative cover in a healthy and growing condition.
4. The pipe or, if encased, the encasement pipe shall completely fit the bored hole and if not encased, the pipe should be a thicker wall within the bore; and shall be a minimum depth of 2 to 3 feet from the bottom of the ditch; and 3 to 4 feet underneath the roadway.
5. All private and commercial access driveways disturbed by pipe laying shall be restored to a condition comparable to that which existed prior to these operations. Special care shall be taken to compact backfill and base material to prevent future settlement. All work shall be complete to the owner’s satisfaction. All public access driveways with paved surfaces shall be crossed by the bored hole method. Crossings of dirt or gravel public access driveways may be made as specified for private and commercial access driveways except that provisions shall be made for uninterrupted flow of traffic.
6. No trees or shrubbery shall be cut or trimmed without the approval of the Panola County Road and Bridge Department.

7. Regulations and ordinances of incorporated cities shall be complied with, if within the City limits.

1. All lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or barrow ditch.
2. All excavation within the right-of-way and not under surfacing shall be backfilled by tamping in 6 inch horizontal layers. All surplus material shall be removed from the right-of-way and the excavation finished flush with surrounding natural ground
3. Lines crossing under surfaced roads and under surfacing cross roads within the right-of-way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity from sewer lines under roadways shall be cast iron pipe.
4. All lines, where practicable, shall be located to cross roadbed at approximately right angles thereto. No lines are to be installed under or within 50 feet of either end of any bridge. No lines shall be placed in any culvert or within 10 feet of the closest point of same.

5. Parallel line will be installed as near the right-of-way lines as is possible and no parallel line will be installed in the roadbed or between the drainage ditch and the roadbed without special permission of the Panola County Commissioners' Court.
6. Operations along roadbeds shall be performed in such manner that all excavated material be kept off the pavement at all times, as well as all operating equipment and materials. No equipment or installation procedures will be used which will damage any road surface or structures. The cost of any repairs to road surface, roadbed, structures or other right-of-way features as a direct result of this installation will be borne by the owner of this line.
7. Barricades, warning signs, lights, and flag man(men) when necessary shall be provided by the contractor or owner. One-half (1/2) of the traveled portion of the road must be open at all times.

**SPECIAL SPECIFICATIONS
FOR PIPELINES CROSSING IN BORED HOLES
AND PLACED PARALLEL TO COUNTY ROADS**

GENERAL NOTE: The construction of this project shall follow "The Panola County Road and Bridge Department Standard Specifications" with respect to barricades, flagmen, flares, warning signs, and all responsibility for complaints or damage suits by traveling public and adjacent property owners.

1. Exaction material shall not be placed on road shoulders or traffic lanes or in ditches where drainage would be impaired. When excavation is permitted near the roadway, where, in the opinion of the County, the support of the oil road structure is endangered, sheeting, cribbing, other measures shall be taken to prevent damage to the roadway or the creation of traffic hazard.
2. All excavations shall be backfilled in a neat and workmanlike manner and all disturbed areas shall be restored to a condition comparable to the original condition. Backfill material shall be consolidated to a density comparable to that of the adjacent undisturbed material, replacing all of the excavated material except that displaced by pipe. The degree of compaction shall be such as to prevent future settlement. Excess material displaced by the pipe shall be removed from the right-of-way or otherwise disposed of to the satisfaction of the county's representative. Pipe laying operation shall not be carried on when soil conditions are such that construction equipment will cause rutting. Backfill operations shall be kept within one mile of trenching and/or pipe laying operations.
3. Sod and/or other erosion control measures removed or disturbed by the installation shall be replaced. This shall include keeping separate and replacing existing topsoil, importing sod or seeding or a combination of these methods together with fertilizer and water as necessary to re-establish vegetative cover in a healthy and growing condition.
4. The pipe or, if encased, the encasement pipe shall completely fit the bored hole and if not encased, the pipe should be a thicker wall within the bore, and shall be a minimum depth of 2 to 3 feet from the bottom of the ditch; and 3 to 4 feet underneath the roadway.
5. All private and commercial access driveways disturbed by pipe laying shall be restored to a condition comparable to that which existed prior to these operations. Special care shall be taken to compact backfill and base material to prevent future settlement. All work shall be complete to the owner's satisfaction. All public access driveways with paved surfaces shall be crossed by the bored hole method. Crossings of dirt or gravel public access driveways may be made as specified for private and commercial access driveways except that provisions shall be made for uninterrupted flow of traffic.
6. No trees or shrubbery shall be cut or trimmed without the approval of the Panola County Road and Bridge Department.

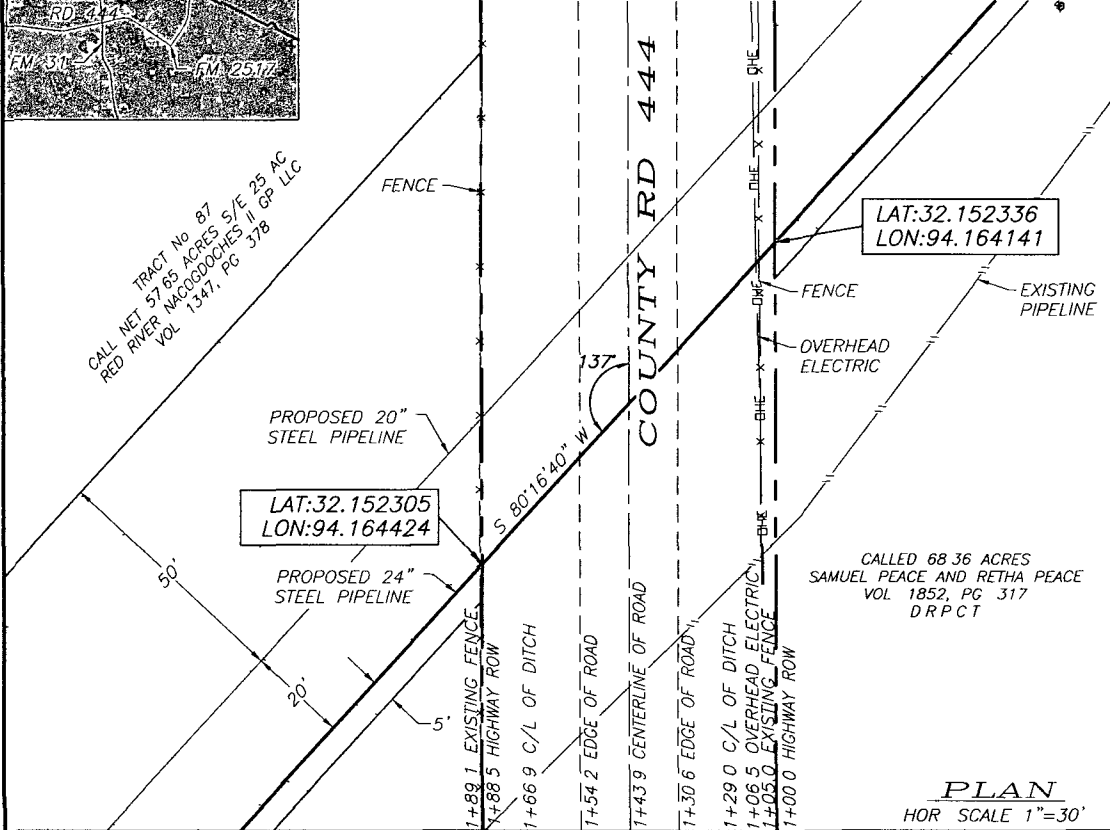

7. Regulations and ordinances of incorporated cities shall be compiled with, if within the City limits.

RE: **CR #463**

The Panola County Commissioners' Court offers no objection to the location on the right-of-way of your proposed **24" bore pipe (class 3): 24" x 0.688" wall API 5L PSL-2 X60** within the right-of-way of County Road **#463** as shown by accompanying drawings and notice except as noted below.

It is expressly understood that the County Commissioners' Court does not purpose hereby, to grant any right, claim, title or easement in or upon this county road. It is further understood that in the future should for any reason the county need to work, improve, relocate, widen, increase, add to, or in any manner change the structure of this right-of-way, any required relocation of said lines shall be at the sole expense of owner.

All work on the county right-of-way shall be performed in accordance with the county instructions. The installations shall not damage any part of the road and adequate provisions must be made to cause minimum inconvenience to traffic and adjacent owners. Special specifications for placing this line are as follows:

1. All lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or barrow ditch.
2. All excavation within the right-of-way and not under surfacing shall be backfilled by tamping in 6 inch horizontal layers. All surplus material shall be removed from the right-of-way and the excavation finished flush with surrounding natural ground.
3. Lines crossing under surfaced roads and under surfacing cross roads within the right-of-way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity from sewer lines under roadways shall be cast iron pipe.

The proposed pipeline will cross under the indicated roads on the attached sheet
Installation shall be made by boring a total length of 50.1 Feet line in Panola County.

The location and description of the proposed line and appurtenances is more fully shown
by the copies of the drawings attached to this notice. The line will be constructed and
maintained on the County Right-of-Way as directed by the County Commissioners in
accordance with current Panola County Specifications

Construction of this line will begin on or after the 25th day of
September, 2017.

RE: **CR #445**

The Panola County Commissioners' Court offers no objection to the location on the right-of-way of your proposed **24" bore pipe (class 3): 24" x 0.688" wall API 5L PSL-2 X60** within the right-of-way of County Road **#445** as shown by accompanying drawings and notice except as noted below

It is expressly understood that the County Commissioners' Court does not purpose hereby, to grant any right, claim, title or easement in or upon this county road. It is further understood that in the future should for any reason the county need to work, improve, relocate, widen, increase, add to, or in any manner change the structure of this right-of-way, any required relocation of said lines shall be at the sole expense of owner.

All work on the county right-of-way shall be performed in accordance with the county instructions. The installations shall not damage any part of the road and adequate provisions must be made to cause minimum inconvenience to traffic and adjacent owners. Special specifications for placing this line are as follows:

1. All lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or barrow ditch.
2. All excavation within the right-of-way and not under surfacing shall be backfilled by tamping in 6 inch horizontal layers. All surplus material shall be removed from the right-of-way and the excavation finished flush with surrounding natural ground.
3. Lines crossing under surfaced roads and under surfacing cross roads within the right-of-way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity from sewer lines under roadways shall be cast iron pipe.
4. All lines, where practicable, shall be located to cross roadbed at approximately right angles thereto. No lines are to be installed under or within 50 feet of either end of any bridge. No lines shall be placed in any culvert or within 10 feet of the closest point of same.

5. Parallel line will be installed as near the right-of-way lines as is possible and no parallel line will be installed in the roadbed or between the drainage ditch and the roadbed without special permission of the Panola County Commissioners' Court.
6. Operations along roadbeds shall be performed in such manner that all excavated material be kept off the pavement at all times, as well as all operating equipment and materials. No equipment or installation procedures will be used which will damage any road surface or structures. The cost of any repairs to road surface, roadbed, structures or other right-of-way features as a direct result of this installation will be borne by the owner of this line.
7. Barricades, warning signs, lights, and flag man(men) when necessary shall be provided by the contractor or owner. One-half (1/2) of the traveled portion of the road must be open at all times.

Approved: 
COUNTY JUDGE

COMMISSIONERS:

Precinct #1 Ronnie LaGrone
Precinct #2 John Gradberg
Precinct #3 Craig M. Lawless
Precinct #4 Dale LaGrone

**SPECIAL SPECIFICATIONS
FOR PIPELINES CROSSING IN BORED HOLES
AND PLACED PARALLEL TO COUNTY ROADS**

GENERAL NOTE: The construction of this project shall follow "The Panola County Road and Bridge Department Standard Specifications" with respect to barricades, flagmen, flares, warning signs, and all responsibility for complaints or damage suits by traveling public and adjacent property owners

1. Exaction material shall not be placed on road shoulders or traffic lanes or in ditches where drainage would be impaired. When excavation is permitted near the roadway, where, in the opinion of the County, the support of the oil road structure is endangered, sheeting, cribbing, other measures shall be taken to prevent damage to the roadway or the creation of traffic hazard.
2. All excavations shall be backfilled in a neat and workmanlike manner and all disturbed areas shall be restored to a condition comparable to the original condition. Backfill material shall be consolidated to a density comparable to that of the adjacent undisturbed material, replacing all of the excavated material except that displaced by pipe. The degree of compaction shall be such as to prevent future settlement. Excess material displaced by the pipe shall be removed from the right-of-way or otherwise disposed of to the satisfaction of the county's representative. Pipe laying operation shall not be carried on when soil conditions are such that construction equipment will cause rutting. Backfill operations shall be kept within one mile of trenching and/or pipe laying operations
3. Sod and/or other erosion control measures removed or disturbed by the installation shall be replaced This shall include keeping separate and replacing existing topsoil, importing sod or seeding or a combination of these methods together with fertilizer and water as necessary to re-establish vegetative cover in a healthy and growing condition.
4. The pipe or, if encased, the encasement pipe shall completely fit the bored hole and if not encased, the pipe should be a thicker wall within the bore; and shall be a minimum depth of 2 to 3 feet from the bottom of the ditch; and 3 to 4 feet underneath the roadway
5. All private and commercial access driveways disturbed by pipe laying shall be restored to a condition comparable to that which existed prior to these operations. Special care shall be taken to compact backfill and base material to prevent future settlement. All work shall be complete to the owner's satisfaction. All public access driveways with paved surfaces shall be crossed by the bored hole method. Crossings of dirt or gravel public access driveways may be made as specified for private and commercial access driveways except that provisions shall be made for uninterrupted flow of traffic.
6. No trees or shrubbery shall be cut or trimmed without the approval of the Panola County Road and Bridge Department.

7 Regulations and ordinances of incorporated cities shall be compiled with, if within the City limits.

Commissioners.
