Solution

We've assessed your information and developed a Dedicated Internet solution that addresses your business needs. The solution includes the following components:

- **AT&T Dedicated Internet**—an internet access service that combines a symmetrical, dedicated connection with symmetrical bandwidth (same download and upload speeds) and provides reliable, high-performance connectivity. AT&T Dedicated Internet includes maintenance of the communications link between service locations and the AT&T network.

AT&T Dedicated Internet Schematic—This diagram shows a typical ADI configuration.

The solution gives you the following features:

- **Reliable Service**—starts with proactive monitoring of our nationwide backbone along with a network architecture that features redundant routers, switches, and power supplies. As a result, we can reroute traffic around outages and restore service almost instantaneously. This increases reliability and helps ensure that your internet traffic gets through. In addition, you get enterprise-class support, with 24/7 expert technical assistance.

- **AT&T Business Center Portal**—provides a suite of online tools to access billing, maintenance, network management, and performance reporting information and functions. Business Center tools let you view and manage various aspects of your AT&T service 24/7 via a convenient online portal.

Pricing

The Dedicated Internet solution includes the following components and pricing (note: NRC = non-recurring charge and MRC = monthly recurring charge):

AT&T grants Customer a limited, non-exclusive, non-transferable license to use the Service during the Term solely in connection with the receipt of the Service. All rights, title and interest in and to intellectual property relating to the Service, including any changes, modifications, alterations, or improvements made by AT&T during the Term, are owned by AT&T, its Affiliates, or AT&T's licensors, suppliers, subcontractors or vendors. Customer's possession, access, or use of any part of the Service does not transfer any ownership rights in the same or any intellectual property rights from AT&T, its Affiliates or AT&T's licensors, suppliers, subcontractors or vendors to Customer.

4.6. Privacy Terms and Conditions

4.6.1. Customer represents and warrants that it has appropriate rights to provide End User data (which may include Customer Personal Data) to AT&T in connection with the Service. Customer expressly grants AT&T permission to access information contained in application layer 7 for the sole purpose of managing the performance of the Wi-Fi network. From time to time AT&T will perform real time packet capture to analyze and troubleshoot network issues and Customer grants AT&T permission to perform such operations for short intervals as necessary for network management purposes.

4.6.2. AT&T agrees that, in performing the network management function, it will:

- Use or monitor End User data shared with AT&T only for network management purposes and for providing metrics reports, consistent with the AT&T Privacy Policy, and
- Establish data retention protocols, so that AT&T retains data shared with it for as long as reasonably necessary for network management purposes

4.6.3. Customer agrees that in connection with the network management function, it will:

- Use or monitor End User data made available through the network management function of the Service only for network management purposes, unless it secures additional consent from End Users, or has another lawful basis for processing the data. Purposes beyond the network management function include, but are not limited to, marketing, advertising, and the examination of content and communications,
- Obtain and maintain any and all legally required employee or End User consents, or establish other lawful bases, for the processing or use of End User data (AT&T can provide an example of the legally required employee or End User consent);
- Obtain multiple consents for distinct purposes, and proposed combinations of personal data, even if supplemental software/technology is required,
- Use only Customer SSIDs,
- Present the End User with Customer's terms of service and applicable privacy policy;
- Establish data retention protocols, so that data Customer processes is retained for no longer than is reasonably necessary for network management purposes,
- Not access, use, or share content of communications, content of email or texts, content of shopping carts, or search term queries, etc., and

4.6.4. Customer is responsible for the way the data is used by Customer, and its employees, guests, and representative's access to and use of the data, content, or communications generated by this Service.

4.6.5. To the extent that a website or online service is directed to or likely to collect personal information from children under the age of thirteen, Customer agrees to comply with the federal Children's Online Privacy Protection Act and provide parental notice and advance parental consent prior to collecting such personal information.

4.6.6. The Service allows Customer to collect and use an End User's location through Bluetooth Low Energy (BLE) and Wi-Fi based location technologies. Such use may be subject to various U.S. and international laws and regulations, including those promulgated by the Federal Trade Commission and other industry regulators (e.g., Privacy Forum's Mobile Location Analytics Code of Conduct, NAI, GDPR, CCPA), with which Customer agrees to comply. Customer agrees not to provide or sell location data to third parties without AT&T's prior written authorization.

4.6.6.1. This ability to collect and use location information is different than what is done with GPS or other technologies. Because the Service collects and uses location information, AT&T is offering the following information, but such information is not intended to be legal advice. Customer should consult with an attorney for legal advice.

4.6.6.2. Depending on how Customer collects or uses the Service, Customer may be required to provide notice, obtain opt-in consents, or provide periodic reminders, all separate from providing terms and conditions to End Users, so that End Users will be aware that location is being tracked when visiting Customer's Sites. If Customer buys other products or services from AT&T or others that, in conjunction with Customer's business application, allows Customer to know when an End User is at Customer's Site(s), Customer may be required to provide separate notices, obtain separate opt-in consents, or provide periodic reminders (all separate from terms and conditions) so that End Users will be aware that location is being tracked in multiple ways when visiting Customer's Site(s).

4.6.7. Customer may not use AT&T's name, brand, or mark, with third-parties or End Users in connection with the Service without AT&T's written consent.
