Re: New AVA Installation

Dear Ms. Bobbie,

Please find below a sales order for the installation and configuration AVA. Pricing for AVA is included into your AVID agreement. AVA is already installed and the search criteria and options selected above.

Service	Cost
Installation of AVA	$5,000.00
Panola County AVID Support Credit	(-$5,000.00)
Total:	**$0.00**

NOTE:

Any hardware required for this implementation is not included and will be charged separately where applicable.

Please feel free to call me if you have any questions or concerns.

If accepted, please sign and email to xxxx@fidlar.com or fax back to the attention of Diana Grabeel at 563-345-1201.

Sincerely,

Fidlar Technologies

State: _TX_

Captcha Settings:

Captcha is a program used to determine whether a human or a machine is attempting to access information from a website. It works by prompting the user periodically for an 'authentication' phrase during their session. It is used specifically to thwart spamming and/or automated 'harvesting' of data from websites. If Captcha is toggled on, when a user accesses your AVA site, they will typically be prompted to authenticate by typing in a phrase that will pop up on their screen after using the service for a set amount of time or amount of activity. Until the user types in the phrase correctly, they will not be allowed to view results, or continue to use the site in any way.

Use Captcha for searches? _✓_ **YES** _____ **NO**

☑ After how many events (execute search, view details) do you want a new Captcha to appear? This is set to 10 events by default, but can be configured. Just check the box for default or enter your preferred number below.

_____

☑ Number of seconds before a new Captcha is required? This is set to 300 seconds (five minutes) by default, but can be configured custom. Just check the box for default or enter your preferred number below.

_____

Wildcard Searching:

*Wildcard searching allows a user to enter a '%' in place of unknown characters or unknown spellings. This type of searching increases the possibility of searchers performing more process intensive searches and could cause overall slowness to the AVA product as well as other products within your portfolio. **Choosing YES will require AVA to run off of your production environment.*

Allow wildcard for searching? _____ **YES** _✓_ **NO**
