This letter is to confirm that the roofing materials being installed for this project consist of impact resistant 35-year architectural shingles. These shingles are manufactured to provide enhanced durability and long-term protection against severe weather conditions.

Additionally, the shingles carry a 130-mph wind warranty, offering superior resistance to high winds and storm-related damage.

These materials meet industry standards for quality, performance, and reliability, and are designed to provide lasting protection and structural integrity for the property.

If any further documentation or information is needed, please do not hesitate to contact us.

Sincerely,

Cody Bowley
